

## Project Manager

### About Neoen

Neoen is one of the world's leading and fastest growing independent producers of exclusively renewable energy. With a capacity of close to 5 GW in operation or under construction, Neoen is a high-growth company. Neoen is notably active in Argentina, Australia, El Salvador, Finland, France, Ireland, Jamaica, Mexico, Mozambique, Portugal and Zambia. In particular, Neoen operates France's most powerful solar farm (300 MWp) in Cestas, and the world's first big battery (150 MW storage capacity) in Hornsdale, Australia.

A player in the fight against global warming and the energy transition, Neoen's mission is to design and implement the means to produce the most competitive renewable electricity, sustainably and on a large scale. As a responsible company whose long-term vision is reflected in a strong and sustainable growth strategy, Neoen is targeting more than 10 GW capacity in operation or under construction by end of 2025.

Neoen (ISIN Code: FR0011675362, ticker: NEOEN) is listed in Compartment A of the regulated market of Euronext Paris. For more information: [www.neoen.com/en/](http://www.neoen.com/en/)

In Finland Neoen is growing rapidly. We have Hedet windfarm in Närpiö in operation as well as Nordic's largest energy storage located in Ylikkälä. We have just started a construction of Mutkalampi windfarm, which is located in the municipalities of Kokkola, Kalajoki and Kannus. When commissioned at the end of 2022, Mutkalampi will be the largest windfarm in Finland with 69 wind turbines. It will generate approximately 2 % of electricity generated in Finland annually. In addition, we are developing multiple solar and wind energy projects which will advance to construction in the years to come.

### Role purpose

We are looking to strengthen our **Development Department** with several new professionals. Key tasks of the Project Development team are to identify new potential wind and solar energy projects and develop the projects successfully from planning and permitting towards construction.

We might have a new career for you whether you are an experienced professional or an energetic new starter in the beginning of your career.

The main tasks include:

- Developing and permitting projects assigned to you. Alternatively, if you are a new starter, you will work side-by-side with our experienced Project Managers growing steadily towards more responsible tasks.
- Project development contains lot of tasks related to land leases, land use processes (EIA, zoning, permitting etc.), financial modeling as well as a high-level technical design related to for example wind turbine generators, grid connections or performance modeling.
- Continuously working with a high number of internal and external stakeholders such as consultants, advisors, authorities and your Neoen colleagues.
- Supporting Neoen's other local teams.
- Bringing new energy to the team, and daring to be innovative.

### Candidate profile

- Suitable educational background.
- You can either be in the beginning of your career or a more experienced professional. We expect you to have experience from similar type or project business or at least some evidence of your suitability to the roles we offer.
- Energy industry experience and basic knowledge GIS systems are an advantage.
- Good interpersonal and social skills, ability to develop and maintain relationships with different stakeholders and partners.
- Readiness to travel to our project sites across Finland.
- Willingness to be part of a small but very dynamic and fast-moving team.
- Interest towards renewable energy, which is currently one of the fastest growing industries in the world.
- Fluent communication skills in English and Finnish. Swedish is an advantage.

#### Conditions

- Permanent contract
- Based in downtown Helsinki
- Starting date: as soon as possible

We hope we got your interest! Please send your application in English to [miika.pilli@neoen.com](mailto:miika.pilli@neoen.com)
