

Internship - Data Analyst Assistant (M/F) Energy Management Department

About Neoen

Neoen is one of the world's leading and fastest growing independent producers of exclusively renewable energy. With a capacity of more than 4,1 GW in operation or under construction, Neoen is a high-growth company. Neoen is notably active in Argentina, Australia, El Salvador, Finland, France, Ireland, Jamaica, Mexico, Mozambique, Portugal and Zambia. In particular, Neoen operates France's most powerful solar farm (300 MWp) in Cestas, and the world's first big battery (150 MW / 193,5 MWh storage capacity) in Hornsdale, Australia.

A player in the fight against global warming and the energy transition, Neoen's mission is to design and implement the means to produce the most competitive renewable electricity, sustainably and on a large scale. As a responsible company whose long-term vision is reflected in a strong and sustainable growth strategy, Neoen is targeting more than 10 GW capacity in operation or under construction by end of 2025.

Neoen (ISIN Code: FR0011675362, ticker: NEOEN) is listed in Compartment A of the regulated market of Euronext Paris. For more information: www.neoen.com

Role purpose

Our **Energy Management Department** is looking for a **Data Analyst Assistant** to join its European team, based in Paris.

The Energy Management Department is leading the optimization and the operation of Neoen's assets on the electricity markets across our different geographies. Historically settled in Sydney, close to our Australian big batteries, the Energy Management Department has recently created a team in Paris to manage our assets in Europe and Central America that include renewable generation and storage.

Operating on the electricity markets requires the continuous collection and analysis of large amount of data, and the development and maintenance of forecasting and optimization models.

As part of the Energy Management Europe team, the Data Analyst Assistant will have the following responsibilities:

- Maintain and improve existing optimization and forecasting models;
- Contribute to new strategic data projects and the development of new tools;
- Support Neoen's efforts to enter in new geographies or new business models by delivering data-driven market analysis;
- Help with the day-to-day running of the team:
 - Data collection
 - Set up of new data feeds
 - Develop and maintain dashboards and reporting tools.

Candidate profile

The candidate will need the following skills and experience to succeed in this role:

- Education: Master's Degree student within Science (Engineering school, University)
- Skills:
 - Data management and analysis
 - Knowledge or interest in Machine Learning techniques and optimization models
 - Strong Python capabilities
 - Knowledge in InfluxDB, SQL is desirable
- Experience or strong interest for the energy industry
- Fluent in English and French
- On the soft skills side, we are looking for someone proactive and curious, with good communication skills and a strong appetite for innovation and international collaboration

Conditions

6-month internship

Based in Paris

Starting date: as soon as possible
